■ Morgan Covers

■ Composite Covers

Morgan Marine modular sectional covers are designed to accommodate BS 6399 Part 3 roof loadings, BS CP3 Chapter V Part 2 wind loadings or other customer supplied specifications. Spans of up to 13m can be achieved in heavy duty or light weight (man-handleable) construction.

Weatherproof and chemical resistant, these covers require little maintenance and have a lifetime in excess of 25 years. Lifting points, ventilation, access covers and walkways can be accommodated as required.

Heavy duty covers can be fitted with hydraulic lifting and rolling gear for one man operation. Covers can also be fitted with low pressure gas tight seals or acoustic treatment.

■ Six Section Cover for a storm storage tank

■ Access Covers

Morgan Marine offer a range of quality, inexpensive square covers in five sizes (600, 800, 1000, 1200 and 1500mm). Standard colours are green 14.C.39 or grey 10.A.07 (to BS 4800), though other colours are available.

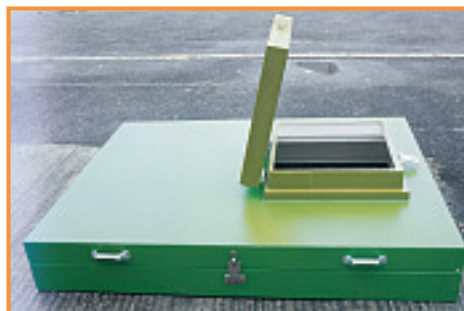

The covers are heavy duty, made of chemically resistant GRP composites with non-corroding fittings, including a hasp and staple. Hold open stays can also be fitted.

■ Case History

Ganol Waste Treatment Scheme, North Wales, UK.

One of the largest single projects ever undertaken by Morgan Marine were the odour control covers for the £45 million project for the provision of a new state-of-the-art treatment plant, renovation and construction of 14 pumping stations.
