

## **Production Manager – Steel**

**Permanent, 40 hours per week, South West Wales**

### **Job Purpose**

- Experienced Production Manager required for our busy steel plant. Your role is to ensure the effective delivery of the factory production plan in line with all Safety, Quality, Cost, Delivery and People standards.

### **Your Tasks**

- Management of staff through all applicable company procedures.
- To interpret and prioritise the production plan.
- Effectively and efficiently utilise all available labour and materials across the production function to ensure product quality.
- Control departmental costs and expenditure.
- Promote best working practice in all production areas.
- Proactively manage health & safety, ensuring effective housekeeping through regular audits.
- Achieve all relevant KPI's and promote a culture of continuous improvement.

### **Skills we need**

- Significant experience of manufacturing management.
- Time served Fabricator/Welder preferred.
- Working knowledge and understanding of IT and ERP systems.
- Understanding of manufacturing efficiencies, problem solving tools and techniques.
- Good working knowledge of Health and Safety.
- Customer Focussed.
- Ability to handle multiple tasks.
- Full driving licence and access to own transport.
- Energetic, enthusiastic and motivated to achieve goals.
- Able to work to targets to deadlines and thrive on the challenge.
- Strong communicator.

### **Salary and Incentives**

We offer a competitive benefits package including;

- Salary: £30-32,000 per annum depending on experience.
- 31 days' holiday rising to 33.
- Life insurance (2 x annual salary).
- Company sick pay (if eligible).
- Pension.
- Free on-site parking.

**Closing date for applications: 3 March 2020**
