

Roadside Range

ROADSIDE CABINETS & TRANSFORMER HOUSINGS

 **MADE IN
BRITAIN**

World leaders in the design, manufacture and installation of GRP Enclosures, cabinets and covers.

Operating from our state-of-the-art sales and manufacturing facility in South Wales – spanning over 9 acres with 120,000 sq. ft of dedicated production space, we're equipped to handle projects of any scale. Our team of seasoned professionals delivers expert in-house sales, engineering, and design support, and our entire range of products is fully manufactured within the United Kingdom.

As NICEIC-certified electrical contractors, we also offer full electrical fit-outs, while our skilled logistics and installation teams ensure seamless project delivery for projects of any size, providing utility and construction sectors across the world with competitively priced market-leading security solutions.

Why buy from Morgan Marine?

Expert Advice

Our experienced team is ready to assist you in selecting the right product based on your requirements.

Flexibility

We offer flexible bespoke options, where our design engineers can tailor our products to perfectly suit your project needs.

Hassle-Free Service

From delivery to setup, we handle every detail, so you don't have to worry about a thing.

Exceptional Experience

Morgan Marine have been manufacturing GRP products for 60 years and have an unrivaled Expertise in Composite Construction.

Key benefits of GRP.

Why GRP (glass-reinforced plastic) is the ideal material for your cabinet, or Transformer housing.

Compact and durable construction

Corrosion resistant / low maintenance

Non-conductive material

Water resistant construction

Lightweight solution for easy installation

By choosing Morgan Marine's GRP enclosures, you're not just investing in a robust and versatile product - you're also making a conscious decision to support a greener, more sustainable method of enclosure manufacture.

Roadside Cabinet Range.

Discover our versatile Roadside Cabinets, available in both GRP and steel configurations. Manufactured to exacting standards, our GRP cabinets feature single, and double-door options with self-extinguishing fire retardant resin, meeting Class 2 BS 476 Part 2 standards.

They are corrosion-resistant and require minimal upkeep, offered in standard colors: BS 5252 14-C-39 Green and 10-A-07 Grey, with customization options to match the full BS 5252 or RAL range.

Alternatively, our steel cabinets, constructed from 2mm pre-galvanized sheet metal and finished to BS or RAL specifications, provide robust protection for instrumentation and control panels.

Ideal for applications across Local Authorities, Network Rail, The Environment Agency and the MOD, our cabinets can be tailored with features like cylinder night latch locks or hasp & staple closures, and pre-fitted with plywood backboards for equipment mounting.

Installation

Our roadside kiosk range have as standard an open base with internal flange for ease of installation. Using this prepared flange, the unit can be fixed to a prepared concrete base with rawl bolts.

Alternatively, a number of our kiosks can be wall mounted. Torbette has an integral composite base as a standard option.

Transformer housings range.

Morgan Marine GRP transformer housings are designed to be both robust and lightweight, featuring high and low ventilation for efficient heat dispersion. For added safety, optional explosion-relieving GRP roofs are available. Large front double doors provide easy access and include a pad-lockable two-point locking system for secure equipment storage.

Independently tested by the Building Research Establishment, these housings meet industry standards and are widely used across rail, construction, utilities, and other industrial sectors.

Excellence in Design & Manufacture.

We provide a comprehensive, turnkey service, managing every stage from design to on-site installation for projects across Europe and beyond.

Unrivalled Expertise in Composite Construction:

 <p>Innovative Design & Engineering</p> <p>Our dedicated design and engineering teams use the latest software to develop tailored solutions for every project.</p>	 <p>Advanced Manufacturing Facilities</p> <p>With 167,000 sq. ft of total manufacturing space, we produce high-quality GRP and steel enclosures to exacting standards.</p>	 <p>Global Export Expertise</p> <p>Our experience in worldwide exports ensures seamless delivery and compliance with international requirements.</p>
 <p>ISO 9001 Quality Assurance</p> <p>We adhere to full ISO 9001 standards, guaranteeing reliability, durability, and exceptional quality in every product.</p>	 <p>Diverse Production Capabilities</p> <p>Our three bespoke production lines manufacture Semi-Gloss GRP, Textured GRP, and Steel products to suit varied applications.</p>	 <p>Specialist Engineering Team</p> <p>Our qualified engineers are experts in multiple disciplines, ensuring technical excellence in every project.</p>
 <p>Dedicated Installation Engineers</p> <p>Our in-house installation team ensures professional and efficient setup, tailored to client needs.</p>	 <p>Standard & Bespoke Product Ranges</p> <p>From Roadside Range and Transformer Housings to custom-built enclosures, we offer solutions for diverse industries.</p>	 <p>Self-Installation Support</p> <p>We provide comprehensive installation manuals for clients opting for self-build projects.</p>
